

Methware IV™

We've got your back.

***Based on three decades of development,
Methware IV leads OTPs into the future!***

Third Party Billing:

Just sit back and wait for the checks!

- Automatic EDI file generation without any other software
- Tracks services automatically
- Helps evaluate facility personnel performance

DoseAssure™

The only way to know for sure!

- Measure your doses with unprecedented accuracy
- Graphical display tells you exactly how much drug you have
- Records the measured weight of each dose
- Aids in the training of new dispensing staff by preventing dosing errors
- Allows the contents of an open bottle to be measured with ZERO loss
- Works with your existing dispensing equipment
- DoseAssure is a standard feature of Methware

Drug Inventory Management:

Never lose a single mg!

- Prescription management with digital signatures
- Integrated control for four types of dispensing pumps
- Comprehensive dose pre-packing features are easy to use
- Secures your cash and inventory

Task Manager:

Distills and interacts with the information you need!

- Keeps an eye on your responsibilities
- Performs any function just the way you like to do it
- Define your own task and accomplish it faster than ever

Case Management:

No one falls through the cracks!

- Automatic notification anytime action is needed
- Assessments—Methware's completely customizable assessment features allow you to design your own assessment tools, and track changes in your patients' status
- Treatment Plans with digital signatures for counselor, patient, counseling supervisor and physician
- Easy-to-understand test result presentation allows for instant evaluation

Versatile Technology:

It does what you want it to do!

- Advanced and easy-to-use security features allow staff access to only the data and features which they need to perform their jobs
- Instant messaging allows your staff to communicate easily and effectively, and allows for easy documentation of communications
- A pre-configured server is included; plug it in to your network and Methware is ready to use
- Integrated report designer gives you the same tools we use to create reports
- Methware is an SQL server based information management system

Tech Support:

When you need help, we're there for you!

- 24/7 priority support
- After-hours support requests generally receive a response within five minutes
- E-mail support is always free
- Our knowledgeable support personnel have the answers

Welcome Station®

The receptionist/cashier you have always wanted!

- Collects all your cash payments — pull out the lock box and take it to the bank
- The Welcome Station® empowers your patients to own their treatment
- Customizable surveys automatically collect critical data

About Us:

Our lead software architect confers 30 years experience in software development for the Opioid treatment industry and 10 years of applied experience as the administrator of a chain of OTPs. Methware IV, the most effective, comprehensive and flexible facility management system available, springs from that cornerstone. The result is a unique system which enables you to overcome the challenges you face today as well as those to come. You can be confident that as treatment modalities change, we will be there to provide you with the tools you need. *We've got your back.*
